Features

■ 0 TO 100% DIMMING

With the use of i2Systems LightLink technology, compatible dimming interfaces include push-button dimming, most leading halogen/incandescent TRIAC style dimmers, 0 to 10V control, and similar controls. In addition, through the use of most Multiplex type systems, the A2162 may be dimmed directly without external controllers.

■ ACTIVE THERMAL MANAGEMENT

Active Thermal Management maximizes the A2162's light output while maintaining a normal fixture operating temperature.

■ RUGGED DESIGN & IP67

Stainless Steel bezel & springs, Anodized Aluminum heat sink housing, electronic regulation to the LED source, and sealed IP67 design ensure product longevity. Truly an engineered solution.

■ SMARTDRIVER INTEGRATED

i2Systems SmartDriver technology is integrated directly inside the fixture, allowing integration to both high-volt (using a power converter) and low-volt DC battery systems. One light may be used for both general lighting and on the battery-backup circuit.

■ ADVANCED OPTICAL SYSTEM

Even light, with no LED "dots" or pixilation, provides the halogen look without the intense heat and high power load.

■ STAINLESS STEEL TRIM WITH TITANIUM COATING

Round, square, square/square and rectangle shapes, with six finish options. Physical Vapor Deposition (PVD) coating provides a very durable surface finish which will not tarnish or discolor.

■ BEAUTIFUL 2700K WARM WHITE

In addition to Cool (6500K) and Neutral (4100K) LED colors, the A2162 is available in 2700K Warm White ready to complement any interior. With i2Systems AccuWhite technology, you can be sure from light to light and batch to batch, that the quality of light and color remain constant.

**Product is rated for exterior applications, however it is not rated for submersible applications and should not be mounted in conditions where there is, or is a possibility of, standing water. When installing in wet or damp locations, it is good practice to seal all fixtures and junction boxes with electronics grade RTV silicone sealant to ensure that moisture cannot enter or accumulate in wiring compartments, cables, or other electrical parts. Product should not be installed in extreme locations, including but not limited to those outside of its temperature/humidity ratings and/or applications where product is subject to water runoff or downspouts.
